PROJECTS

PERSONAL PORTFOLIO USING HTML AND CSS
- Developed and designed a professional portfolio website using HTML and CSS, showcasing my skills, projects, and achievements.
- Created a visually appealing and user-friendly interface to effectively display my skills and projects, allowing potential employers to easily navigate and explore my work.
- Included detailed descriptions of my projects, highlighting the technologies used, challenges overcome, and the impact and value created through my work.
- Incorporated a dedicated contact section in the navigation bar, providing my up-to-date contact information and encouraging employers and clients to reach out for further inquiries or collaborations.

POTHOLE DETECTION USING DEEP LEARNING AND COMPUTER VISION
- Demonstrated proficiency in Python and computer vision libraries such as OpenCV and face recognition.
- Developed an attendance management system using face recognition technology to automate the attendance tracking process.
- Utilized file handling and CSV files to maintain a record of attendance, showcasing skills in data management and manipulation.
- Demonstrated strong problem-solving skills in identifying faces in real-time video streams and successfully matching them with a pre-defined database of faces.
